Business Models Investment Process

Nowadays, companies are facing three major issues: **Globalisation**, **Digitalisation** and **Regulation**.

Companies are no longer developing at a constant pace. Therefore, it is necessary to:

- Analyse the lifecycle of the companies, score and segment Business Models

- Seek attractive upside potential/rating company profiles

Our investment philosophy, integrating ESG criteria, aims to assess a company's upside potential as a function of its positioning in its lifecycle and to benefit from upward or downward trends in market stock's valuation.

Investment universe

The fund invests predominantly in European large and mid caps.

Risk / Return Profile

Risk associated with discretionary investment management • Risk of loss of capital • Equity risk • Small caps risk • Emerging equities risk • Derivatives market risk • High yield market risk • Interest rate risk • Credit risk • Default risk • Foreign exchange market risk • Liquidity risk.

NAV (IPD share class) 277,06

BEFORE ANY INVESTMENT, PLEASE CAREFULLY READ THE KIID AND PROSPECTUS OF THE UCIT
Presented performance refer to IPD share class. See full disclaimer overleaf

Portfolio

Markets extended their rally during March at a more moderate pace. Despite sharp downgrades in 2019 outlook among major economic forecasts, the promise of fresh liquidity facilities from the central banks drove the indices higher. The fund underperformed slightly due to slower progress among our Mature Growth Business Models (BM). Although Compass, Unilever and Reckitt Benckiser contributed positively, Thalès lost momentum this month and KBC was impacted by the downturn in interest rates, along with the whole banking sector, which the fund is underexposed to. Our Transition BMs also weighed slightly on performance due to profit taking in Fnac Darty following a strong year-to-date performance, and Drillisch which was hit by fears over its investment potential in the 5G market. On the other hand, our Rapid Growth BMs extended their excellent performances, particularly Qiagen and Puma. Lastly, despite our low exposure to Recovery BMs, this category boosted the fund's performance due to judicious stock-picking, notably in Subsea 7 which rallied further. During March, we increased our weighting in the travel & leisure and retail sectors. We also reduced our exposure to banks and to tech stocks by selling Atos, which had rallied sharply recently, given the group's lack of dynamic sales momentum in the US.

Investment approach

The objective of the fund is to achieve annualised capital appreciation in the long term through a risk adjusted outperformance against the benchmark. The stocks are picked on an active, fundamental, bottom up, discretionary and unconstrained approach. The recommended minimum investment horizon is five years.

Investment Universe

The fund will invest its assets in equity and equity related securities issued by companies that are headquartered in the European Union, or conduct the preponderant part of their activity in the European Union.
