## Best Business Models Investment Process

Nowadays, companies are facing three major issues: **Globalisation**, **Digitalisation** and **Regulation**.

Companies are no longer developing at a constant pace. Therefore, it is necessary to:

### Analyse the lifecycle of the companies Business Models

### Look for attractive pairs of share price upside/downside risk

Our investment philosophy, integrating ESG criteria, aims to assess a company's upside potential as a function of its positioning in its lifecycle and to benefit from upward or downward trends in market stock's valuation.

## Investment universe

The fund invests predominantly in European large and mid caps.

## Risk / Return Profile

**Risk associated with discretionary investment management** • Risk of loss of capital • Equity risk • Small caps risk • Emerging equities risk • Derivatives market risk • High yield market risk • Interest rate risk • Credit risk • Default risk • Foreign exchange market risk • Liquidity risk.

### Portfolio

During a turbulent October, markets were dominated by risk aversion fuelled by fears of a slowdown in the economic cycle and further geopolitical tensions. The least cyclical companies held in the portfolio fared better in relative terms. As such, Mature Growth and Transition Business Models, which are the least risky, outperformed the riskiest categories such as Rapid Growth and Recovery.

Our cautious allocation in Recovery BMs contributed positively. Within this BM category, Linde was boosted by the completion of the merger with Praxair. Some Mature Growth BMs, including Thalès and Teleperformance, were impacted by fears of an economic slowdown, while Atos was hit by a profit warning. Transition BMs were neglected by investors for the same reasons, led by cyclicals such as Arkema and UPM. Lastly, our stock-picking among Rapid Growth BMs performed relatively well, notably thanks to satisfactory quarterly earnings from Puma and X5 Retail.

During the month, we increased our weightings in the personal goods sector and reduced our exposure to industrial goods, Chemicals and Basic Resources.

### Investment approach

The objective of the fund is to achieve annualised capital appreciation in the long term through a risk adjusted outperformance against the benchmark. The stocks are picked on an active, fundamental, bottom up, discretionary and unconstrained approach. The recommended minimum investment horizon is five years.

### Investment Universe

The fund will invest its assets in equity and equity related securities issued by companies that are headquartered in the European Union, or conduct the preponderant part of their activity in the European Union.
